

**Ohio State Medical Association
Conflict of Interest Resolution Attestation Form**

In order to guarantee the independence of content at live educational activities, we ask that all speakers at Ohio State Medical Association (OSMA) sponsored or jointly sponsored events complete this form in order to agree or disagree with the statements indicating compliance with the Standards for Commercial Support. This will help ensure that you agree to give a presentation that is educational in nature, rather than promotional, and to present information that is unbiased, balanced and to the extent possible, evidence-based or based on best practices or accepted business standards. Please indicate your understanding of and willingness to comply with each statement below. If you have any questions regarding your ability to comply, please contact Mary Whitacre as soon as possible.

Agree Disagree

 I have disclosed to the OSMA all relevant financial relationships. I will assist and/or cooperate with the OSMA to resolve any potential conflicts that I might have.

 The content and/or presentation of the information with which I am involved will support quality or improvements in healthcare deliver or operations, and will not promote a specific proprietary business interest. The content will be well balanced, unbiased and based on standard clinical and/or business principles.

 I have not and will not accept any honoraria, additional payments or reimbursements beyond that which has been agreed upon directly by the OSMA.

 I understand that the OSMA may need to review my presentation and/or content prior to the activity, and I will provide educational content and resources in advance as requested.

Agree Disagree N/A

 If I am presenting at a live event, I understand that a CME monitor may be attending the event to ensure that my presentation is educational and not promotional in nature.

 If I am providing recommendations involving clinical medicine, they will be based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications in the care of patients. All scientific research referred to, reported or used in CME in support of justification of a patient care recommendation will conform to the generally accepted standards of experimental design, data collection and analysis.

 If I am discussing specific health care products or services, I will use generic names to the extent possible. If I need to use trade names, I will use trade names from several companies when available, and not just trade names from any single company.

 If I have been trained or utilized by a commercial entity or its agent as a speaker (e.g. speaker's bureau) for any commercial interest, the promotional aspects of that presentation will not be included in any way with this event.

I have carefully read and considered each item in this form, and have completed it to the best of my ability.
