

Date of Meeting: 10/29/07

Venue: Quest Center

Target Attendees: Mid to Upper Management, Policy makers

Goals:

- 1) HPIO's primary goal is to make sure that this summit occurs and occurs successfully.
- 2) Our second goal is to participate with others involved, primarily those active in the AWG group, to develop a quality program that supports the policy development and social aspects of HIT world, as past summits have done.
- 3) I would think that the summit provides an opportunity to react to the work that has occurred up to that date on policy development, which could include (I hope) an existing executive order and an engaged advisory commission working on the next stages of implementing the roadmap. It could also include an understanding of the proposals that have gotten external funding (such as FCC), if those efforts have proven successful.
- 4) Networking

Agenda Possibilities:

Regarding the agenda for the meetings, it seems to me that there are many forums from local HIMMS chapters and OHIMA that include elements on technical issues. However, it could be time for the summit to expand its scope, having a general keynote or opening session that excites the crowd and emphasizes the policy developments going on, and then a technical track on how to do RHIOs or some aspects of HIT and a more policy track.

- 1) Learning about HIT/Preparing for HIT
- 2) OHHIT Roadmap/Proposal/Executive Order
- 3) HIT Funding Opportunities
- 4) HIT related Legislation
- 5) HISPC - Security and Privacy
- 6) RHIO - Regional efforts panel or presentations
- 7) HIT panel Discussion - Payer, Hospital, Provider, Emergency
- 8) Government related HIT panel Discussion - ODH, Medicaid, Pharmacy Bd, etc

Keynote or featured speaker - Ted Strickland or Governor's office

Single track vs. Multi-track
